ALL SIZES ARE AVAILABLE IN
HONED OR POLISHED

Stone is a natural substance and is a product of the earth. You can expect variations in color, texture, veining, thickness/size and density. These variations enhance the natural beauty of the stone and should not be considered defects. Natural stone will differ not only between the different kinds of stone but also within each stone type. Some photography of the stone may not depict that actual color, shading or texture of the batch delivered.
