All Cosmos Sync Art Stainless Steel sinks are made of 304 Stainless Steel, UPC Coded and Corrosion Resistant.

With a tensile strength of up to 250,000 PSI, 304 stainless steel is used for making aircraft components, architectural support and railroads.

Cosmos sinks bear a Universal Product Code verifying each and every sink is quality inspected for the highest caliber materials, quality and craftsmanship.

Cosmos' sinks have the highest stainless steel corrosion resistance.

For more information on our sinks, visit [cosmosurfaces.com](http://cosmosurfaces.com) or contact a location near you.
